PERFORMANCE DNA -

Every Under Armour® product is doing something for you; it's making you better. Following are the core pieces of DNA that deliver on this promise. The building blocks of performance.

Water repellent performance fabric.

Strategic venting built into garment at key points where the body dumps heat. Keeps the athlete cool in hot conditions.

Lightweight fabrics with built-in 4-way stretch improve mobility and accelerate dry time.

Wicks moisture from the body, keeping the athlete dry.

Fabric treated with antimicrobial agents.

Ultraviolet protection shields your skin from the sun's harmful rays and inhibits premature aging.

The high visibility solution for training safely during low light conditions.

Blocks wind from penetrating to the body. Helps regulate core body temperature.

Locks gear in place using a tactified compound that prevents slippage.

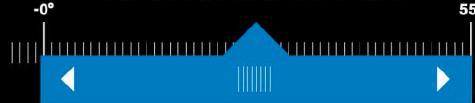

Specialized seaming that feels smooth against the skin and prevents chafing.

GEARLINES -
